

Applying to Join Engineers Australia through a Mutual Recognition Agreement (MRA)

About Mutual Recognition Agreements (or Reciprocal Recognition or Mutual Exemption Agreements)

Engineers Australia has entered into bilateral agreements with several engineering associations in other countries. A principle of these agreements is that, under normal circumstances, an engineering professional, who lives and practises for an extended period in a foreign country, should seek membership, at the appropriate grade, of an appropriate engineering association in that country.

Engineers Australia has established Mutual Recognition Agreements (MRAs) with Institutions around the world through which a member of such a body, on application, will be accorded an equivalent level of membership in Engineers Australia and vice versa. In some cases, the agreements cover more than one grade of membership and occupational category.

PLEASE NOTE: As a condition under many of the agreements, the applicant's formal undergraduate qualifications must be acceptable to both bodies in accordance with the Washington or Sydney Accord. Where undergraduate qualifications are not acceptable under one of these Accords, the applicant may be asked to submit a Stage 1 Assessment application as a first step towards membership under the relevant MRA.

Engineers Australia currently has MRAs with the following overseas engineering bodies:

American Society of Mechanical Engineers (ASME)	Institute of Marine Engineers, Science and Technology (IMarEST)	Institution of Chemical Engineers (IChemE)
Hong Kong Institute of Engineers (HKIE)	Institution of Engineering and Technology (IET)	Institution of Engineers, Ireland (IE Ireland)
Institution of Civil Engineers (ICE)	Institution of Mechanical Engineers (IMechE)	Royal Institution of Naval Architects (RINA)
Institution of Structural Engineers (IStructE)	Royal Aeronautical Society (RAeS)	The Texas Board of Professional Engineers (TBPE)
Canadian Council of Professional Engineers (Engineers Canada)	Chartered Institution of Building Services Engineers (CIBSE)	Institution of Engineers, Malaysia (IEM)

The following pages detail the application procedures for applicants who have membership of the engineering bodies listed above. Please refer to the information applicable to the relevant body only.

Individual MRA Details

American Society of Mechanical Engineers (ASME)

ASME Grade	Engineers Australia Grade
Member	Grade dependent on review of qualifications and experience.
