

Note from 2011 overall winner

Southern Seawater Desalination Integration Project

Water Corporation was absolutely thrilled to be judged the overall winner at the Western Australian 2011 Engineering Excellence Awards.

The project was undertaken by the Southern SeaWater Alliance, comprising Water Corporation, Valoriza Agua, Técnicas Reunidas, AJ Lucas, WorleyParsons and local partners, GHD and Georgio Group.

Everyone involved in this large team have taken great pride in the accolades the project has received. The award has served to confirm the huge efforts made by all to ensure the success of such a significant State infrastructure project.

Water Corporation Project Director, Nick Churchill, said being part of the award process had enabled the team to look back at both the small and large project components and recognise where team work and engineering excellence had enabled the complex project elements to fall into alignment.

The Engineering Excellence Awards have enabled the Water Corporation to showcase the highlights of this project amongst the many other amazing projects on the go in Western Australia. I am extremely proud to have been able to pit ourselves amid the field of amazing engineering achievement produced in this State.

Water Corporation would encourage any company to submit an entry for consideration for the WA Engineering Excellence Awards.

Nick Churchill

2012 WA ENGINEERING EXCELLENCE AWARDS

THE WA ENGINEERING EXCELLENCE AWARDS ARE THE HIGHLIGHT OF OUR PROFESSIONAL CALENDAR, DESIGNED TO RECOGNISE, CELEBRATE AND PROMOTE ACHIEVEMENT AND INNOVATION BY THE ENGINEERING PROFESSION ACROSS WESTERN AUSTRALIA

The pioneering qualities and excellence of Engineering in Western Australia have underpinned the development of our flourishing modern state. Equally, the continued creativity and panache of Engineering will guarantee our State's future success and well-being, taking it to new levels of growth and diversity.

The Engineering Excellence Awards provide the opportunity to celebrate and publicise achievements in cutting-edge projects, management and innovation.

The Awards are judged in 10 categories allowing recognition for the rich range of engineering endeavours active across Western Australia: from large-scale iconic infrastructure development through to small company projects; from control systems and procedures through to the management of engineering.

An overall WA Engineering Excellence Award is also made.

These will be presented at the Awards Night to be held on Saturday 15 September 2012.

Judging is undertaken by a panel comprising senior members of the profession and community representatives.

If you have an exemplary project, put it forward to gain the prominence that it deserves and celebrate your achievement through a memorable evening at the Awards Ceremony. Your participation will help Engineers Australia to showcase WA engineering excellence, assist in communicating the vital role of engineering to the community, and both attract and inspire future engineers.

Barry Tonkin FIEAust CPEng
2012 WA Division President

Engineering Excellence Awards Categories

- Resource Development
- Infrastructure & Building
- Products & Manufacturing
- Control Systems, Reports & Procedures
- Environment
- Engineering for Regional Communities
- Electronics, Telecommunications & Information Technology
- Management of Engineering
- Innovation & Development
- Small Company Projects

WA Engineering Excellence Award

Chosen from the category winners, the most outstanding project will receive the prestigious 2012 WA Engineering Excellence Awards Trophy.

The Award recognises an accomplishment of exceptional engineering merit which makes a major contribution to the community.

Benefits of Entry

- Publicity for your company and project
- Recognition from peers and industry
- Inclusion in the 2012 WA Engineering Excellence Awards showcase booklet
- Winners will be eligible to enter the 2012 Australian Engineering Excellence Awards
- Inclusion in a professional audio visual presentation at the Awards Dinner.
- Inclusion in the public exhibition of the 2012 Award entries

Eligibility of entries

Projects located anywhere in the world are eligible for entry, providing that a significant element of the engineering component was completed or co-ordinated in Western Australia. Projects must have been completed or substantially completed, within a 24 month period prior to the closing date of the entries.
