ASWEC is a leading technical forum for the exchange of peer-reviewed research outcomes and industry best-practice in Software Engineering.

ASWEC attracts Australian, regional and international participants including Software Engineering researchers, practitioners and educators.

ASWEC 2013 will be a mix of industry and research presentations, a panel session and numerous opportunities for academic & industry participants to interact with and learn from each other.

Keynote Speakers:
- Carrie Gates (CA Labs): Tech Transfer in the Trenches
- Darren Croton (Swinburne): Building synthetic universes in the "cloud": the Theoretical Astrophysical Observatory (TAO)

Pre-conference program - June 4:
- includes a Ph.D. student symposium & a number of workshops & tutorials.

Swinburne University of Technology
Hawthorn Campus
Melbourne, Australia

Just 10 minutes by train from the cafes and shops that central Melbourne has to offer.

Please check the conference's website for full conference details:
