

Associate Professor Julie Mills FIEAust CPEng

ENGINEERING DISCIPLINE: Civil Engineering (Structural in particular)

EMPLOYMENT:

Associate Professor and Program Director of Civil Engineering at the University Of South Australia'

ACHIEVEMENTS & AWARDS:

2006 Carrick Australian Citation Award for University Teaching for Outstanding Contributions to Student Learning

High Commendation in 1998 McGraw-Hill New Engineering Educator Award for distinguished contribution to Engineering Education, presented by Australasian Association for Engineering Education.

PERSONAL BACKGROUND:

In my spare(?) time, my family is heavily involved in several sports including hockey, tennis and basketball, so I spend a lot of my time as the family taxi driver and watching games and I try to keep fit with some walking and generally just running around after the kids!

WHY I CHOSE ENGINEERING:

I chose engineering because I liked maths and science and wanted to do something practical with them and because I had no idea that at the time I graduated less than 1% of professional engineers in Australia were women.
