Graduate Roadmap

Live events

Graduate edge events

These quarterly events are held in all Divisions, aimed at providing soon-to-be graduates and graduates with professional skills to give them a competitive edge in the workforce.

Networking and communications

March 2016

This event will provide attendees with valuable skills and insights into the importance of effective communicators in the engineering industry, from a small consultancy company to a large multi-national.

 *Can't attend? Watch the webinar!*

Identify, assess and manage risk

July 2016

This event will provide attendees with valuable skills on how to identify and manage risks in engineering projects. The event will also provide an insight into why this is important from a Government (customer) perspective and will showcase a "best-practice" industry case.

 *Can't attend? Watch the webinar!*

Ethics

May 2016

Understanding the consequences of your intended actions is becoming more important in today's business environment. This event will provide valuable examples of how to deal with ethical dilemmas and recognise unethical situations.

 *Can't attend? Watch the webinar!*

Creativity and innovation

October 2016

This event will provide attendees with valuable skills to develop creative and innovative solutions to engineering problems.

 *Can't attend? Watch the webinar!*

Graduate Roadmap business skills seminars

Following the successful delivery of 27 workshops and two webinars across the country in 2014, with positive feedback from over 800 young engineers, Young Engineers Australia (YEA)'s national business skills seminar series is back in 2016 with new topics to further challenge and inform you.

Engineering Education Australia (EEA) is proud to present this interactive workshop structure, aimed at improving your learning outcomes and information retention.

Select a topic below for more information and local event dates.

- ▶ **Presentation skills**
- ▶ **Conflict resolution**
- ▶ **Effective networking**
