

# Instructions for The Arrow

Materials: A4 paper, scissors

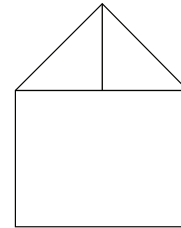

ENGINEERS  
AUSTRALIA

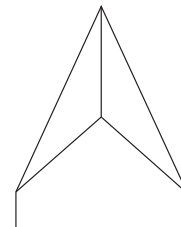

1. Turn your piece of paper so that the arrow is facing up. Then, flip the paper over onto its backside, so that you cannot see any of the fold lines.

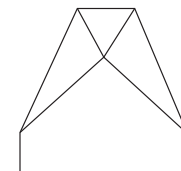

2. Pull the top right corner down toward you until fold line A is visible and crease along the dotted line. Repeat with the top left corner.

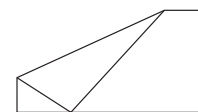

3. Fold the right side over again and crease along fold line B.

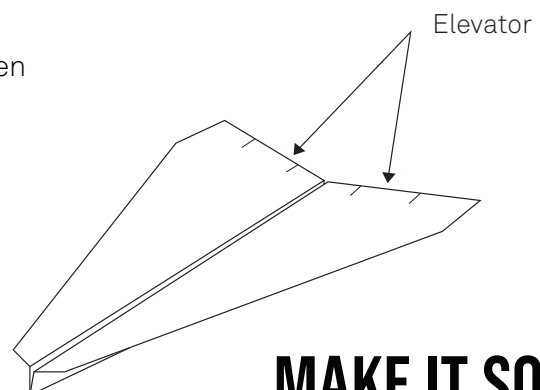

4. Fold the tip down toward you and crease along fold line C

5. Now, flip the paper over. Then, fold left side over onto the right side and crease along fold line D so that the outside edges of the wings line up.

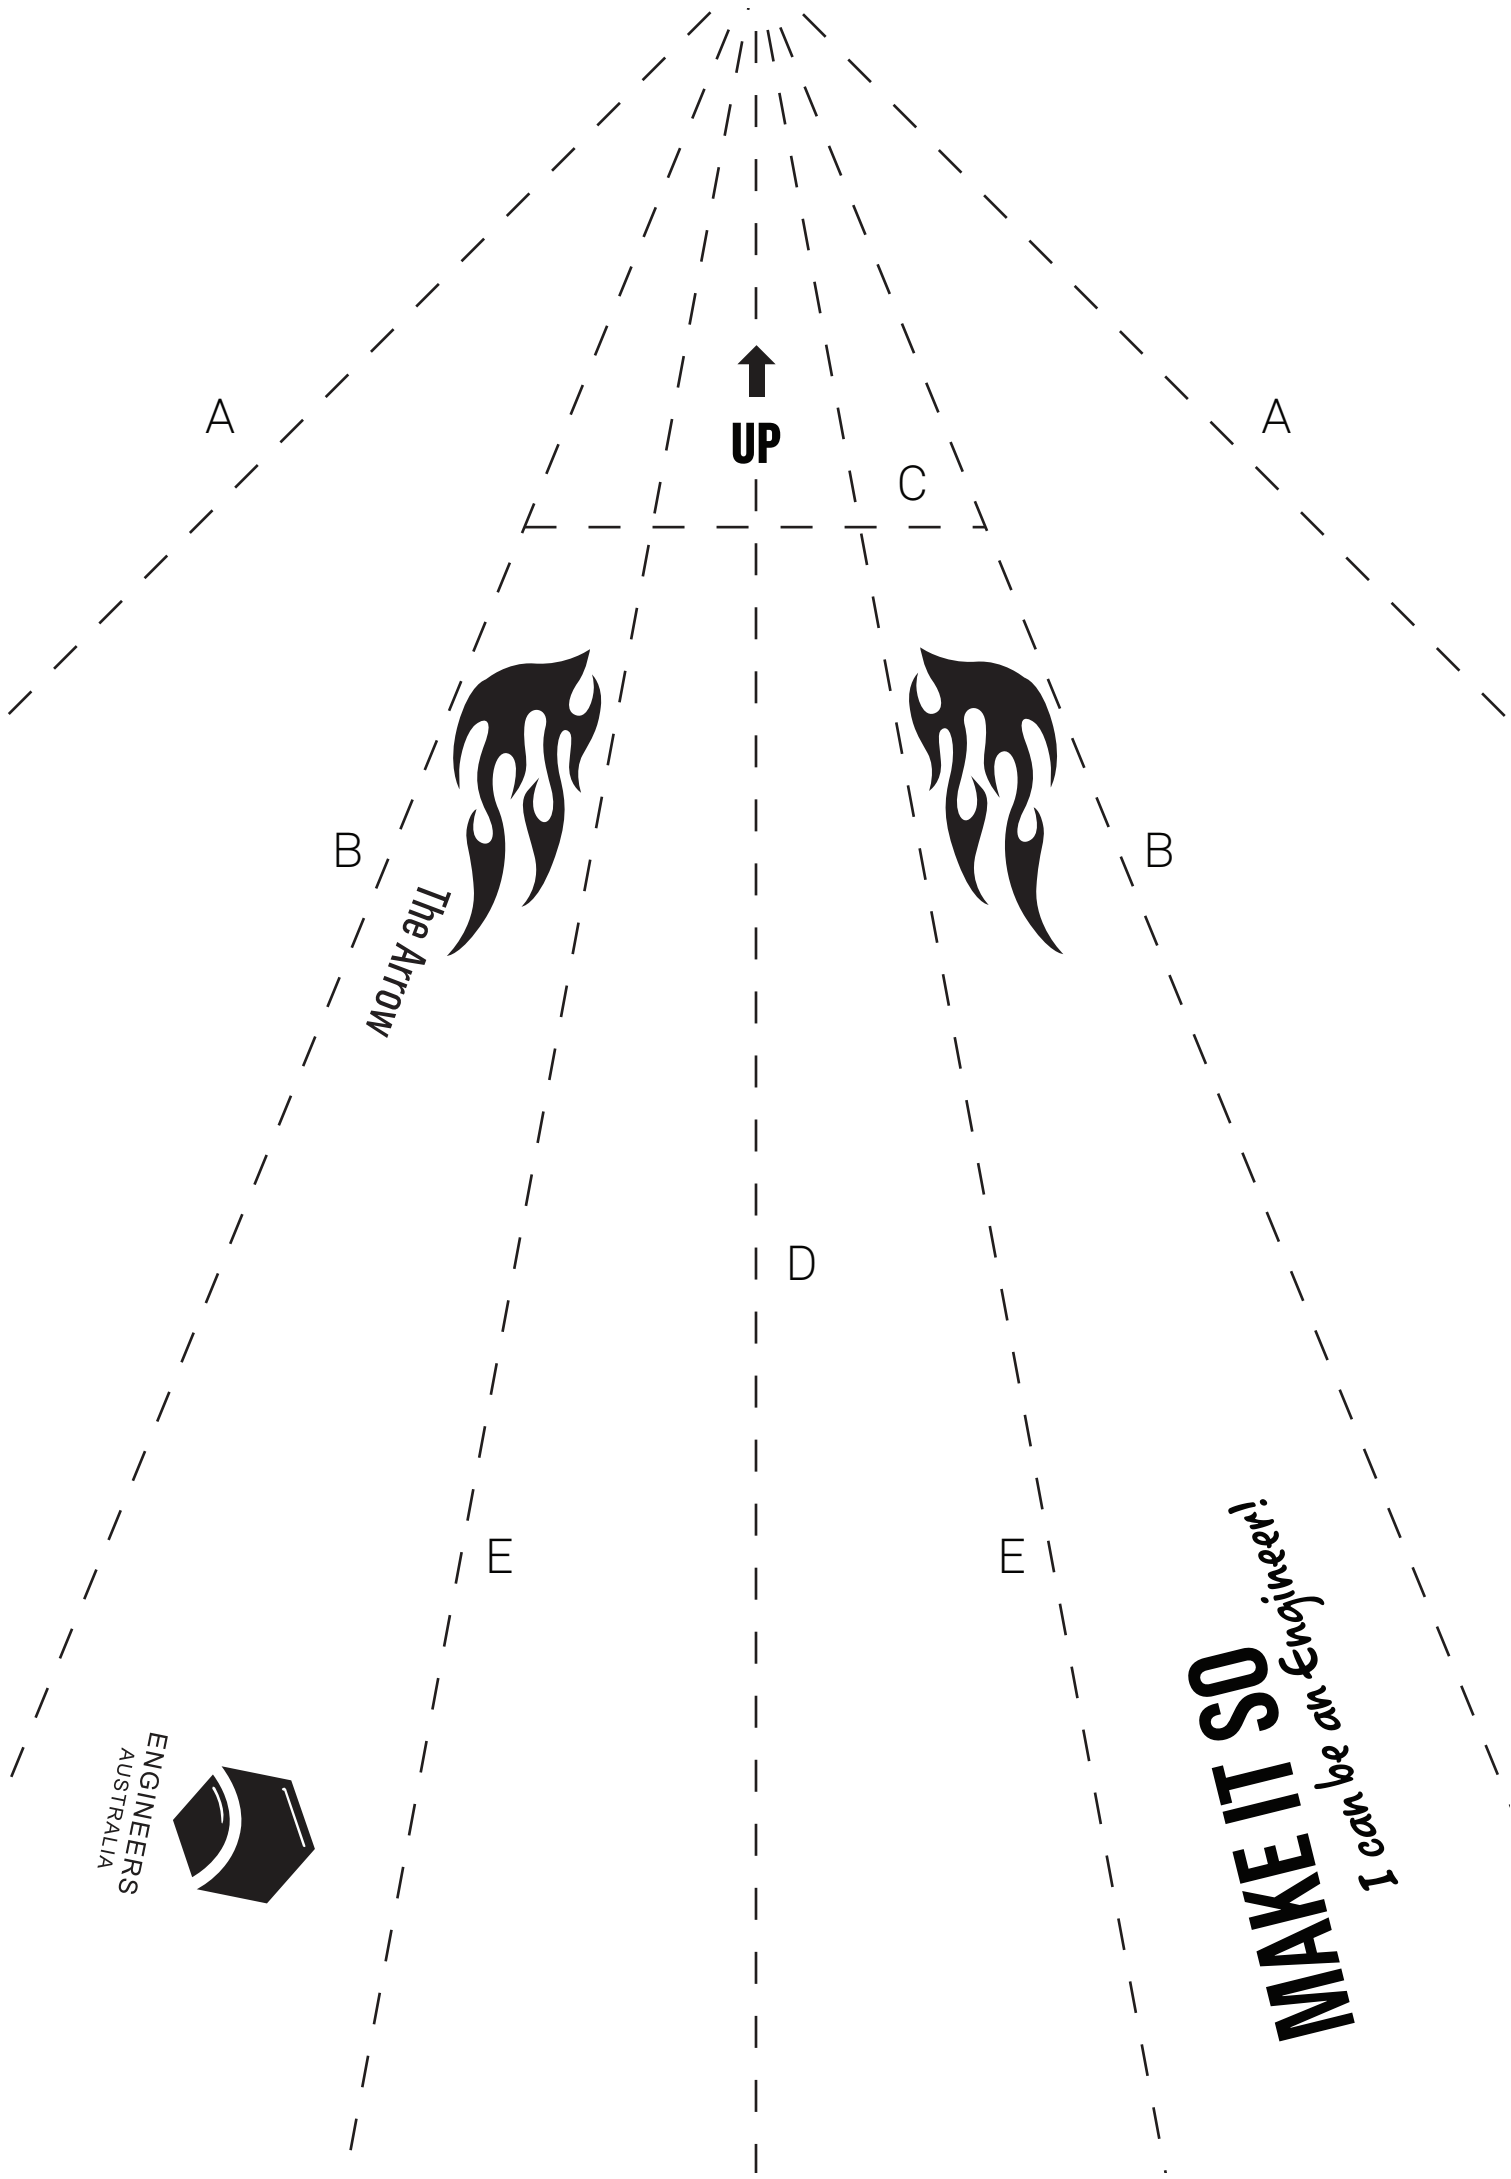

6. Fold the wings down along fold lines E. Partially open the folds you just created so that the wings stick out straight. Cut two slits, evenly apart, along the back edge of each wing for elevator adjustments.

Now you are ready to fly!
