

Instructions for The Raptor

Materials: A4 paper, scissors

ENGINEERS
AUSTRALIA

1. Turn your piece of paper so that the arrow is facing up. Then flip the paper over so that none of the fold lines are showing.

2. Fold the top right and top left corners in until fold lines A appear and crease along the dotted line.

3. Fold the nose down toward you and crease along fold line B.

4. Fold the nose down toward you again and crease along fold line C.

5. Fold the top edge down toward you again and crease along fold line D.

6. Flip the plane over and fold the right half over the left half along fold line E so that the outside edges of the wings line up.

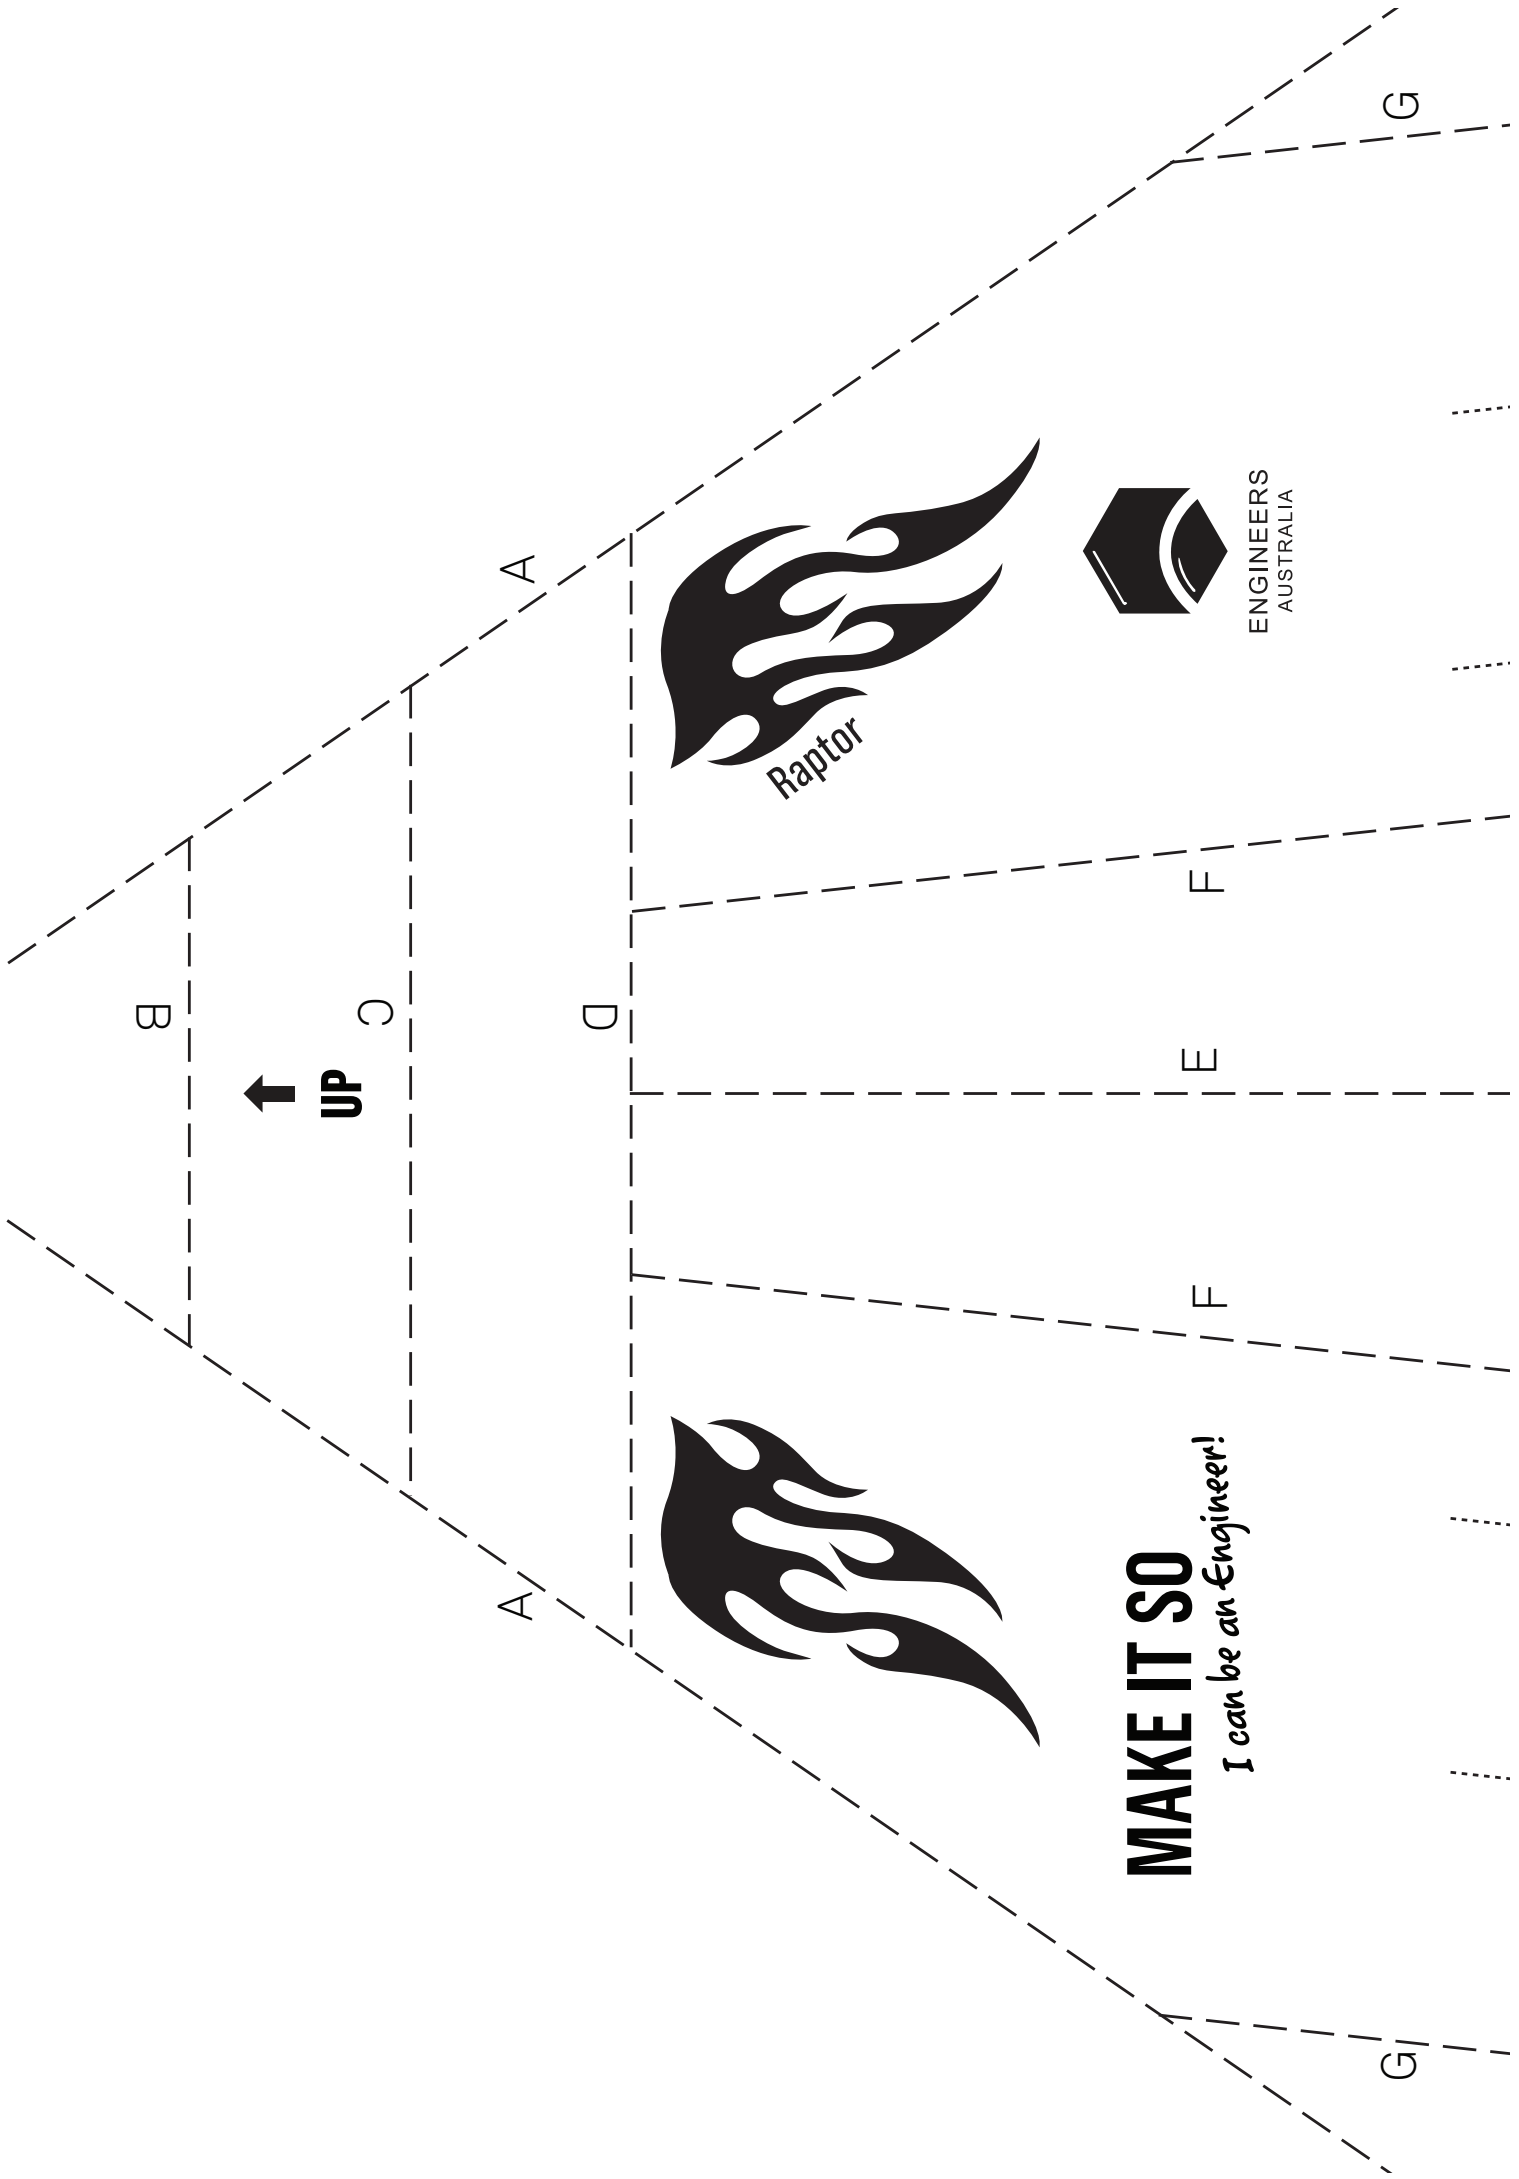

7. Flip the wings down along fold lines F and the winglets up along fold lines G. Cut two slits along the back edges of both wings for elevator adjustment. The wings will have a slight "V" shape when viewed from the front.

You are ready to fly!
