The FPSO Execution Strategy Development Presentation is an extract from Crondall Energy’s highly acclaimed FPSO training course. The presentation covers:

- The fundamentals of developing a strategy.
- Strategic options and alternatives for FPSO projects.
- An overview of the market.
- Management of risk.
- Project cost and schedule.

Attendees will gain useful insight into associated key success factors and options that typically need to be considered in an FPSO project. Particular focus is given to strategy development through the project phases; scope definition; procurement strategy and contracting strategy. The presentation also includes indicative cost and schedule trends and a market update.

ABOUT THE SPEAKER

Mark Evans is an engineer with +15 years’ technical and management experience in the oil and gas industry. He has gained this through working on various FPSO/FLNG/FSO projects & fixed platform/MOPU projects in both management and technical engineering roles in naval architecture & marine. These have spanned from conceptual selection right through to installation & operation. His core technical skills relate to hull structures, moorings, construction and installation, however, he also have a good understanding of interfacing process systems and subsea systems.

His most recent roles have included managing FLNG concept studies, managing delivery and installation of the Balmoral FPSO riser column and mooring system and Lead Engineer (Naval Architecture, Marine & Subsea) for a Malaysian FPSO from Pre-FEED to FEED. Mark is currently working as a Principal Naval Architect at Crondall Energy Consultants.
