Application of Australian Rainfall and Runoff (ARR2016) in Urban Areas Workshop

1:00pm - 5:00pm, Monday 7 May 2018

Engineers Australia, Level 31, 600 Bourke St, Melbourne, Victoria

This afternoon workshop will be presented by the editors and authors of Book 9 of ARR and will cover the philosophy and application of ARR in Urban catchments. The workshop will provide an overview of ARR and its application in urban areas. This workshop will include practical application via examples, open discussion and answers to questions. Importantly, this workshop is an opportunity for practitioners and ARR editors to discuss the objectives, the application and challenges of the new ARR Urban Book as part of completing the Book.

Workshop Presenters

The workshop will be delivered by Dr Peter Coombes and Mr Steve Roso, who have both delivered a diverse range of projects based on water resources, including urban design, stormwater and runoff.

Dr Coombes and Mr Roso have decades of experience and hundreds of completed projects between them.
