Leadership Breakfast
“Shaping Australia’s Future: economy, society and place”

Hosted by the College of Leadership and Management

Engineers Australia recently established its ninth professional College – the College of Leadership and Management – as a home for those engineers whose career has moved into leadership of businesses and key technical disciplines and management of major projects.

The College will provide for the professional development of members and recognise competence through the granting of grades of membership.

David Singleton, College Chairman invites all those with an interest in Australia’s urban future to this leadership breakfast, set to be a challenging debate amongst quality panelists.

MODERATOR

Doug Aberle
CLM Western Australia

Doug is a transformational leader who has 40 years’ experience in the intensely scrutinised environment of Western Australia’s largest electricity company, culminating in six years as Managing Director. Over this time he has honed and integrated his skills as an engineer, project manager, negotiator and coach. In parallel he has developed a psychotherapy practice over 30 years and is a Master Clinician with the Australian Association of Relationship Counsellors and registered by the Psychotherapy and Counselling Federation of Australia. Through his business, Marple Bridge Pty Ltd, Doug currently provides coaching, mentoring and consultancy services to senior business professionals.

Jenelle Provost
General Manager of Elizabeth Quay, Metropolitan Redevelopment Authority

Jenelle Provost is currently the General Manager of Elizabeth Quay at the Metropolitan Redevelopment Authority. She is managing the transition between project delivery and the operational phase of the project, using the MRA’s unique Place Making Model. The Elizabeth Quay precinct is due to open in late 2015. Jenelle’s current role evolved from her previous position as Director of Place Activation for the MRA. Jenelle is a fellow of Leadership WA and has served on a number of boards including Perth Zoo, MosArts (Mosman Park Arts Association), Women’s and Family Health Services and currently the Centre for the Built Environment and Health.

Andrew Harris
Director, Laing O’Rourke

Andrew Harris is a Professorial Fellow in Chemical and Biomolecular Engineering at The University of Sydney, and the Australian director of Laing O’Rourke’s engineering and innovation consultancy, the Engineering Excellence Group. Laing O’Rourke is Australia’s largest private engineering and construction business, and was ranked in the top 10 most innovative businesses in Australia by BRW magazine in 2014. Andrew received his PhD from the University of Cambridge in 2002 and is a Chartered Engineer and Fellow of the Institution of Chemical Engineers (IChemE) and Engineers Australia (IEAust). Throughout his career he has worked at the interface between industry and academia, across the resources, oil and gas, energy, advanced manufacturing, nano and biotechnology sectors.

Jürgen Schneider
Head of Market Development - Pacific, Siemens Ltd. Australia

Jürgen Schneider is Head of Market Development – Pacific, Head of the Executive Relations Program for key accounts and Executive Sponsor for the Marine Defense portfolio. Until recently he was also Regional General Manager for Siemens in Victoria, South Australia and Tasmania. Jürgen has previously managed a number of divisions within Siemens, and performed strategic business development roles in the aluminium, oil and gas, mining and infrastructure sectors. Jürgen has extensive multinational business and government relations experience in South Korea, Japan, Canada, the USA, Brazil, Singapore, India, the UK, France, Belgium and the Scandinavian countries.

John Pickhaver
Executive Director, Co-Head of Infrastructure, Utilities & Renewables, Australia/NZ, Macquarie Capital

John has 16 years of experience in the infrastructure sector both as a civil engineer and in infrastructure finance. While at Macquarie, John has advised on corporate and project financings, mergers & acquisitions and arranging debt and equity for transactions including power stations, electricity transmission, gas pipelines, wind farms, energy storage, rail, light rail and road infrastructure including PPP transactions. John has also provided strategic financial advice to corporates in relation to capital structure reviews, and governments in relation to energy and transport infrastructure assets and financing.

David Singleton
Non-Executive Director and College Chairman

David Singleton is a board Chairman and Non-Executive Director; a respected thought leader and expert advisor on resilient leadership and practice, specialising in infrastructure, business sustainability and climate change resilience. He is a member of the Swinburne University of Technology board, a director of Standards Australia Ltd and a director and Chairman of the Infrastructure Sustainability Council of Australia.
