

Thought Leaders: Spring Forward Series

Episode 1: Prof. David Keene

Engineers Australia UK Chapter (EAUK) invites you to this Thought Leaders: *Spring forward Series*, that looks at the engineering and commercial aspect through bespoke interviews of key leaders from the industry. Episode 1 is about Prof. David Keene, CEO of Aurrigo.

OVERVIEW

When we hear the phrase “autonomous vehicles”, for many of our first thought is of driverless cars. Coventry, UK based company **Aurrigo**, has developed a range of autonomous vehicles for a range of different industries.

From autonomous baggage dollies being used by British Airways at Heathrow Airport to a four-seat autonomous pod designed for first and last-mile transportation in urban areas, or a shuttle in use at the University of Cambridge’s West Cambridge campus, **Aurrigo** has become a leader in the provision of innovative transport solutions.

In the first of the **Thought Leaders: Spring Forward Series**, **Andrew Grill**, a former Engineer from Adelaide, now Futurist in London will interview Professor David Keene CEng, CEO of Aurrigo.

This Webinar will focus on the innovative technology developed by the Team at **Aurrigo**, as well as how they overcame supply chain issues during lockdown, including why **Aurrigo** decided to set up a base in Adelaide to reduce the time to market.

Professor Keene is not only a gifted Engineer but also a thought leader in this emerging space and this is a webinar not to be missed.

KEY TAKEAWAYS

- How **Aurrigo** went from a University research team to a global company
- How Autonomous vehicles are able to supplement existing transport solutions in multiple industries
- How Engineers are uniquely able to solve a range of complex business problems by using first principle thinking
- The opportunity for global trade for Aurrigo’s products and services particularly between UK and Australia
- How **Aurrigo** is harnessing the forces of nature for the greater good of mankind
- What the future of work looks like for Engineers in a distributed work environment
- What will be the “new normal” in 2022 and beyond

VENUE

Webinar – Online

DATE & TIME

18 June 2021 | 8:00am BST
(17:00 AEST)

TICKETS (incl. GST)

EA Members – Free
Non-Members - Free

REGISTRATIONS CLOSE

17 June 2021 at 12:00pm BST
