This mini symposium will explore the unique synergy between each of the three critical asset areas with a view to optimise value in each through resource recovery.

Topics will cover the production of biogas energy from waste food and water, and will highlight techniques implemented by industry, government and academic institutions in reducing loss and recovering value from each process streams.

**Presentations**

‘Breaking Silos - The Nexus Thinking’
Dr Shirin Malekpour
Monash Sustainable Development Institute, Monash University

‘Aurora Waste to Energy - A New Perspective on Energy Recovery’
Mr Ian Donald
Project Manager, Yarra Valley Water

‘Coles Recycling and Waste Minimisation Strategies’
Ms Kathryn Franklin
Sustainability Manager, Coles
