Public Transportation – The Growing Need for Systems Thinking

The Victorian Transport Working Group of the Systems Engineering Society of Australia

Join the Victorian Transport Working Group of SESA for a presentation outlining the growing need for systems thinking in the public transport industry.

Overview

Shaun Wilson will present on behalf of the SESA Victorian Transport Working Group on the growing need for systems thinking in the public transport industry.

Speaker

Shaun Wilson

Chief Executive Officer, Shoal Engineering Pty Ltd

During his career, Shaun has led a range of technology initiatives including development of the first in-service Unmanned Aerial System (UAS) for the Australian Army, early development of broadband

communications capability for Antarctica using small satellites and practical implementation of model-based design approaches for large, complex military systems (since used for major defence programs).

Shaun led the 'spin out' from Shoal of QxBranch, a US-based quantum computing and data analytics firm that services finance, insurance, aerospace, and security customers worldwide, and the cyber-risk insurance firm Envelop in London.

CPD Hours

This session is worth up to 1 Engineers Australia CPD Hour.
