RTSA 20th Anniversary Panel Session and Railway Networking Event
Hosted by Railway Technical Society of Australasia

Overview
Join Railway Technical Society of Australasia (RTSA) in celebrating their 20th anniversary whilst taking part in a panel discussion around how the industry can resource to meet the burgeoning quantity and scale of Rail Projects.

Phillip Campbell | National Chair of RTSA | General Manager Technical Standards ARTC will provide an overview of RTSA’s successes including CORE conferences, awards and other key achievements to date.

John Dyer | Project Manager Standard Design Solutions Program Engineering Level Crossing Removal Authority will discuss how LXRA is working to optimise design and construction resources and reduce costs across the program. With over 25 level crossings removed to date, there is a significant amount of design information now available for re-use. John Dyer will outline how this design data is being captured and reused for future level crossing removals, and explain the potential benefits available.

The panel topic is "How the Rail Industry can resource to meet the burgeoning quantity and scale of Rail Projects within Victoria/Australia" and will focus what is currently being done to ensure adequate competent resources are available and suggestions for further enhancements.

Following the panel discussion there will be an opportunity for networking, during which drinks and nibbles will be served.

Panellists
Diane Riley | Director SNC Lavalin
Professor Elizabeth Croft | Dean of Faculty of Engineering, Monash University
Phil Ellingworth | Chief Engineer, Metro Trains Melbourne
