Redeveloping Wangaratta Livestock Exchange

Hosted by: Engineers Australia North East Group

Join the presentation and a walk through of the Wangaratta livestock complex redevelopment

The WLE saleyards are an important cattle auction centre in northeast Victoria.

Their operations contribute directly and indirectly to the local, regional and state economies and employment opportunities.

Rural City of Wangaratta completed the saleyards redevelopment early last year by adding a roof structure to cover the cattle yards and create an 'all-weather' facility.

Join us to hear from Allan Thurm about the Yard redevelopment and walk through of the complex

Speaker
Allan Thrum,
Project Officer from Rural City of Wangaratta

Allan will provide an overview that covers the yards, funding arrangements, the design and tender phases, and obstacles.

Allan will also talk through the construction phase including how saleyard operation was maintained, commissioning and learnings from the project.

For those that wish to join, we will be returning to the saleyards canteen for a self-funded meal.

Safety Requirements
Please bring closed in Shoes

CPD Hours
This session will be worth 2 Engineers Australia CPD Hours
