This Century – Leading (and Engineering) Care

Tuesday, 26 May 2020 | Webinar

When care is limited, leadership is a license to kill. Engineers know this in all we plan, design, build and maintain. We manage and lead people amid complexity to work together artfully to make things happen. We integrate multiple disciplines into a coherent whole. We make trade-offs across outcomes and resources. We evolve designs and build sustainable solutions. We are quiet achievers in a noisy world.

How then can we help people think and act differently through compounding

crises knowing we also need to prepare for the next? How much of the way we think and act is transferable to the social context? Might we elevate our profession to help other managers and leaders shape society with the same care we display to our engineering? It's a question for our time. If we stay quietly achieving while a world 'snaps-back', might our legacy contribution be a missed opportunity?

Dr Richard Hodge will explore these questions.

Meet the Speaker: Dr Richard Hodge

Director, Dr Richard Hodge.com Pty Ltd | This Century Leadership

Richard is an expert in viable system design with a focus on sustainability. He has extensive experience across public, private and academic sectors as a consultant, general manager and company director. Richard advances new thinking for complex enterprises. He works at the enterprise, portfolio and program levels to design and deliver systemic interventions to improve outcome delivery, collaboration and interdependence across programs and their related work domains.

LIVE STREAMS

AEST (NSW, ACT, QLD, VIC, TAS)	5.30pm
ACST (SA, NT)	5.00pm
AWST (WA)	3.30pm

TICKETS

EA & SESA Members	FREE
Non-Members	\$30
